

Document Center

DRUCKSYSTEM

Schlankes Output-Management

FAKTORZEHN

WHY USE DOCUMENT CENTER?

With our output management system, we offer a web-based option, based on current technologies to centrally manage text modules in Microsoft Word format and to create document templates. On this basis, printed documents can be generated in a wide variety of formats such as PDF, docx and tiff. Programming of the letter template is not necessary. Changes can be made by the depart-

ment itself. A REST interface allows the output management system to be easily connected to existing systems and integrated into existing business and batch processes. You will also ensure retrospective cost savings thanks to an enormous increase in efficiency. Furthermore, automated processes ensure the necessary legal and audit security.

ADVANTAGES OF DOCUMENT CENTER?

For your business users

- Central management of document templates and text modules
- Quick and easy configuration of serial standard letters, invoices or contracts
- Automated creation of documents in the desired output format
- Printed documents can be created by the user
- Simple testing of document configuration and creation of test documents by the user
- Complete guarantee of revision and legal security

For your development department

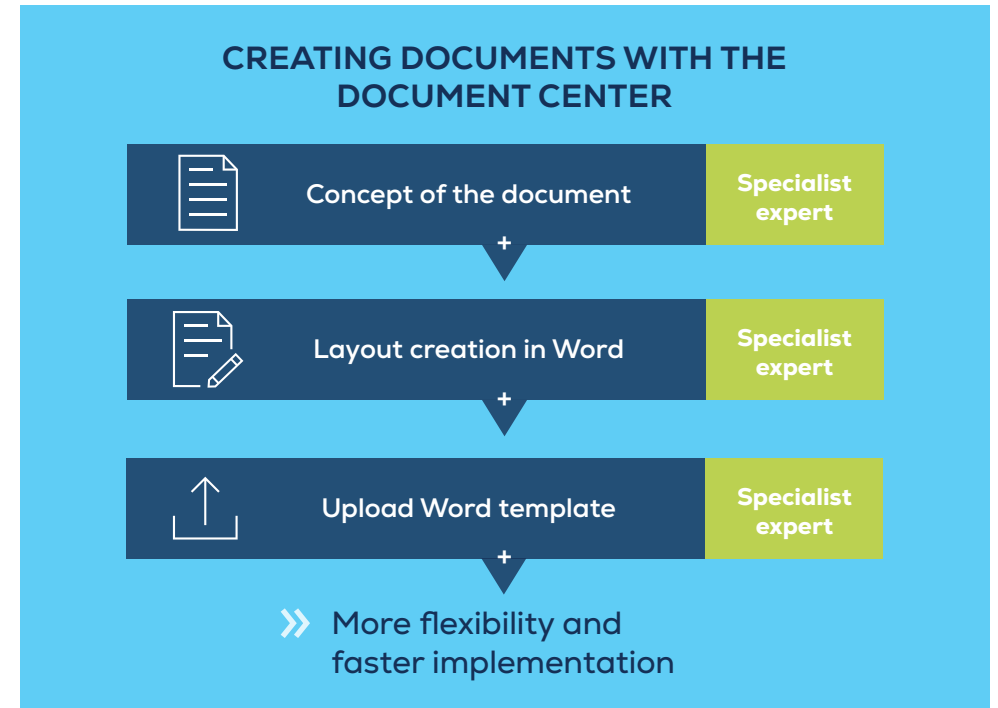

- Processing of MS Word modules without an installation of MS Word on the server
- Installation on-premise or in the cloud due to container technology
- Relief of the IT department

CORE FUNCTION OVERVIEW

WHAT TECHNOLOGY IS BEHIND IT?

- REST interfaces
- 100% Java
- Latest container technology
