

# Faktor- IBP

Insurance Business Partner

**PARTNER SYSTEM**

for efficient partner management

**FAKTORZEHN**

## WHY USE FAKTOR-IBP?

With our partner system, you can maintain your partner data centrally without losing historical data. In doing so, you comply with the legal requirements of the General Data Protection Regulation (GDPR) and the Code of Conduct (CoC) - both for your customer-related data and for the data of your prospects and other stakeholders. With the wide range of operating options you can use our partner system as central partner management or as a supplementary system to your existing partner systems, which offers

many possibilities for simple migration. As all partner functions are also available as a REST service, for example, new partners can also be created during the entry of business transactions without a system break. With our open source user interface framework linkki, you benefit from a high degree of flexibility and low maintenance effort for your interfaces. Our Faktor-IBP partner system also offers many other customizing options and can therefore be adapted to the needs of your company.

## ADVANTAGES OF FAKTOR-IBP?

### For your business users

- Cross-LoB and cross-channel business partner management for the entire Group - for both, customers and prospects
- Legal requirements for the storage of personal data are met
