

Faktor- IBP

Faktor Zehn Insurance Business Partner

FAKTORZEHN

Why do you need Faktor-IBP?

Faktor-IBP has evolved from our customers' need to be able to manage any business partner even if there isn't much data available.

What does Faktor-IBP offer?

Integration		
(Upstream/downstream partners such as SAP BP, inspection services, inventory, damage, printing etc.)		
Core functions of Faktor-IBP		
Services for external interfaces and portals		
New partner entry and customer number assignment	Search of partners	Duplication management
360 degree customer view	Historical partner data	Relationships and groups
Interfaces to registered LoB systems	Legal (DSGVO, CoC)	Data protection and authorizations
Flexible role concept	Various operational options	Technical add-ons
Model data in Faktor-IPS		
Partner structure	Default values and rules	Value lists and tables

What is the technology behind it?

- 100 % Java
- Service-oriented architecture REST or SOAP API
- Consistency of interface design, using linkki, our UI framework
- Seamless and easy integration
- Direct access to the partner model, adapters to peripheral systems available, all functions accessible via REST services

How does Faktor-IBP integrate into your system landscape?

What are the advantages of using Faktor-IBP?

- Group-wide partner management across LoB's and across channels management for both customers and prospects
- Complies with legal requirements for the storage of personal data
- Change journal for information on historicized data storage
- Easy integration with ready-made interfaces and REST services, including to other partner systems
- Based on proven basic functions of the Faktor Zehn Suite
- Versatile expansion by means of add-ons
- Built in cooperation with our customers, and tailored to your needs
